

DAVID SILVA

Backend Engineer

Email: david.silva@example.com | Location: Kandy, Sri Lanka

PROFESSIONAL SUMMARY

Backend Engineer with 6 years of experience designing high-throughput APIs and distributed systems. Strong background in Python services on AWS with an interest in applied machine learning.

SKILLS

- Python
- AWS
- API design
- Database design
- Microservices architecture
- Basic Machine Learning (online courses, side projects)

TECHNOLOGIES

FastAPI, PostgreSQL, Redis, Docker, RabbitMQ, Git

WORK EXPERIENCE

Backend Engineer - FinEdge Systems (2020 - Present)

- Core developer on the Payment Gateway Platform processing 2M transactions/day, built with Python, FastAPI and PostgreSQL on AWS.
- Introduced Redis-based caching that cut median API latency by 45%.
- Containerised all services with Docker and automated deployments.

Software Engineer - Lanka Retail Tech (2018 - 2020)

- Built and maintained the Inventory Management System backend in Python.
- Designed relational schemas and reporting queries in PostgreSQL.

PROJECTS

- Payment Gateway Platform: high-volume payments backend. Python, FastAPI, PostgreSQL, Redis, AWS.
- Inventory Management System: retail stock management backend. Python, PostgreSQL.

EDUCATION

- BSc in Software Engineering, Sri Lanka Institute of Information Technology (2017)

DOMAINS

Backend Development, Financial Technology
