

MICHAEL JAYAWARDENA

DevOps Engineer

Email: michael.jayawardena@example.com | Location: Galle, Sri Lanka

PROFESSIONAL SUMMARY

DevOps Engineer with 8 years of experience automating infrastructure and delivery pipelines. Deep expertise in Amazon Web Services, infrastructure as code and container orchestration.

SKILLS

- Amazon Web Services
- Infrastructure as Code
- CI/CD automation
- Container orchestration
- Linux administration
- Cost optimisation

TECHNOLOGIES

Terraform, Docker, Kubernetes, GitHub Actions, Prometheus, Grafana, Bash

WORK EXPERIENCE

DevOps Engineer - CloudReach Lanka (2019 - Present)

- Technical lead for the Cloud Migration Initiative, moving 40+ on-premise workloads to Amazon Web Services with Terraform-managed infrastructure.
- Operates Kubernetes clusters hosting 120 microservices.
- Drove the CI/CD Modernisation project, cutting release lead time from two weeks to under one day with GitHub Actions.

Systems Engineer - IslandHost (2016 - 2019)

- Administered Linux server fleets and automated provisioning with Bash and early Terraform adoption.

PROJECTS

- Cloud Migration Initiative: on-premise to AWS migration programme. Terraform, Docker, Kubernetes, Amazon Web Services.
- CI/CD Modernisation: pipeline automation rollout. GitHub Actions, Docker.

EDUCATION

- BSc in Computer Systems and Networking, University of Peradeniya (2015)

DOMAINS

DevOps, Cloud Infrastructure
