

PRIYA RAJ

Data Scientist

Email: priya.raj@example.com | Location: Colombo, Sri Lanka

PROFESSIONAL SUMMARY

Data Scientist with 6 years of experience delivering machine learning solutions from research to production. Specialised in Natural Language Processing and predictive modelling, with hands-on AWS deployment experience.

SKILLS

- Python
- Machine Learning
- Natural Language Processing
- Statistical modelling
- AWS
- Data storytelling

TECHNOLOGIES

TensorFlow, Pandas, scikit-learn, SQL, Jupyter, Docker, Git

WORK EXPERIENCE

Senior Data Scientist - Nexlify Solutions (2022 - Present)

- Model owner on the Customer Support AI project: trained and evaluated the intent classification and response-quality models using TensorFlow and Python.
- Deployed model endpoints to AWS and monitored drift in production.

Data Scientist - InsightWorks (2019 - 2022)

- Built the Churn Prediction Model for a telecom operator, improving retention campaign targeting by 30% using scikit-learn and SQL feature pipelines.
- Ran NLP analysis of customer feedback to surface product pain points.

PROJECTS

- Customer Support AI: LLM-based support assistant - model training and evaluation. Python, TensorFlow, AWS.
- Churn Prediction Model: telecom customer churn predictor. Python, scikit-learn, SQL.

EDUCATION

- MSc in Data Science, University of Colombo (2019)
- BSc in Statistics, University of Jaffna (2016)

DOMAINS

Artificial Intelligence, Data Science
