

RAVI KUMAR

Data Engineer

Email: ravi.kumar@example.com | Location: Colombo, Sri Lanka

PROFESSIONAL SUMMARY

Data Engineer with 5 years of experience designing batch and streaming data platforms. Builds reliable pipelines on Amazon Web Services with strong SQL and Python foundations.

SKILLS

- Python
- SQL
- Data pipeline design
- Amazon Web Services
- Data warehousing
- Data quality engineering

TECHNOLOGIES

Apache Spark, Apache Airflow, Snowflake, Docker, dbt, Git

WORK EXPERIENCE

Data Engineer - CloudReach Lanka (2021 - Present)

- Built the Enterprise Data Lake on Amazon Web Services, ingesting 30+ source systems with Apache Spark and orchestrating workflows in Apache Airflow.
- Supported the Cloud Migration Initiative by re-platforming legacy ETL jobs to the new AWS environment.

Analytics Engineer - InsightWorks (2019 - 2021)

- Modelled warehouse schemas in Snowflake and dbt for marketing analytics.
- Wrote complex SQL transformations powering executive dashboards.

PROJECTS

- Enterprise Data Lake: centralised data platform. Apache Spark, Apache Airflow, Amazon Web Services, Python.
- Cloud Migration Initiative: legacy ETL re-platforming. Python, SQL, Amazon Web Services.

EDUCATION

- BSc in Computer Engineering, University of Peradeniya (2018)

DOMAINS

Data Engineering, Cloud Infrastructure
